MINIMISE DESK CLUTTER AND WORK ERGONOMICALLY

ZONE 5
MINIMISE CLUTTER

Keep workspaces clear. Cable managers, CPU holders and desktop power products help to organise your space and work ergonomically.

Our guide below provides tips on creating an accessible and clutter free workspace to reduce back, neck and shoulder strain and enhance comfort throughout the day.

HOW NOT TO WORK

× Unsightly power and cables not organised and secured.

× Excessive desktop clutter.

× Twisting

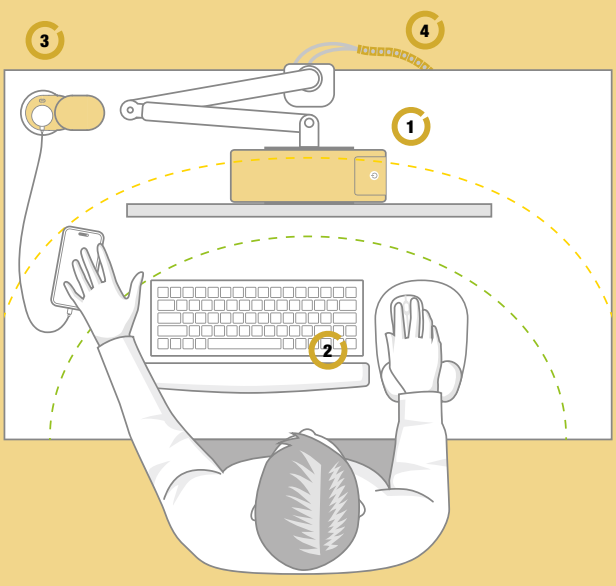
× CPU's taking up valuable desk space.

× Non-essential items in the primary working zone.

HOW TO WORK ERGONOMICALLY

1. Move anything that you don't need from your desk where possible. Use **CPU Holders** to mount CPUs under desks or on monitor arms.

2. Keep items that you use regularly at the front of your desk and within arms reach when you are sat back correctly in your chair. E.g. keyboard, mouse, wrist rests. Move items you use less frequently further back.



3. Installing **desktop power** helps to reduce the number of cables around your workspace, as well reducing the risk of injury from bending and twisting under desks.

4. Keep cables out of sight and improve accessibility by organising cables in effective **cable management systems**.

WHY DOES IT MATTER?

Almost a **THIRD** of office workers admit that their **desk is cluttered or a mess**[1]

1 in 3 In a survey conducted by Fellowes office workers **want an organised/tidy desk** with everything where it should be[2]
