

## Maintain **NIS-2 compliance** with **PRIVASCREEN™ PRIVACY FILTERS**

The Network & Information Security 2 (NIS-2) Directive is an EU legislation, which came into effect in 2024, is aimed at strengthening cybersecurity and cyber resilience across Europe.

### Who is it for?

#### Essential Entities

Energy

Transport

Digital Infrastructure

Banking

Financial Market Infrastructure

Drinking Water

ICT Management

Public Administration

Space

Waste Water

Health

#### Important Entities

Post & Courier Services

Waste Management

Manufacturing

Chemical Production

Research

Food Production

Digital Providers

### Organisation size

NIS-2 applies to large and medium-sized businesses in the two categories:

#### LARGE

250 employees > annual net turnover of €50 million > balance sheet of **€43 MILLION**

#### MEDIUM

50 employees > annual turnover or balance sheet > **€10 million**

### What are the main principles?

#### Accountability

Management must prevent cyber risks by approving and training staff on cybersecurity protocols.

#### Reporting

Organisations must report major cybersecurity incidents within 24 hours if services are disrupted, or within 72 hours otherwise.

#### Continuity

Businesses must maintain continuity plans covering system recovery, emergency procedures, and crisis response for major cyberattacks.

#### Managing Risk

Organisations should reduce risk through incident management, encryption, access controls, and stronger supply chain and network security.

### Why use Privacy Filters to protect your data?

**PrivaScreen™ privacy filters** help protect on-screen data from visual hacking, supporting compliance with NIS-2 by safeguarding sensitive information against unauthorised viewing.

# Protect your on-screen data with **PRIVASCREEN™ PRIVACY FILTERS**

Reduce visual data theft and prevent unauthorised access with the **PrivaScreen™ Privacy Filters**.

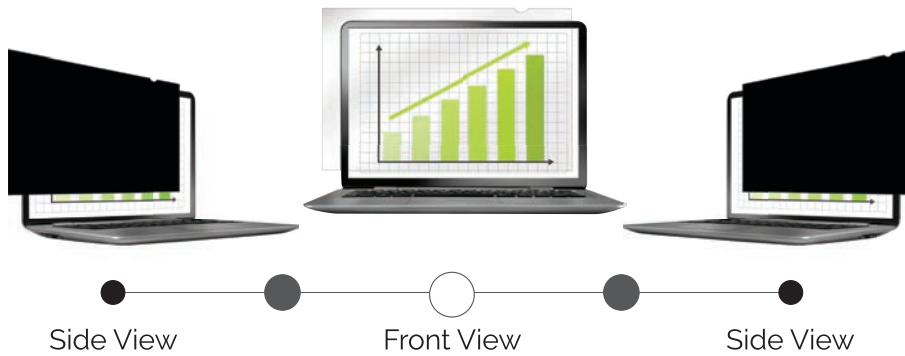

## **3 Steps** to protecting your on-screen information

with **PrivaScreen™ Blackout Privacy Filters** by Fellowes®

<b>1</b> <b>THINK</b> about your business	<b>2</b> <b>CHECK</b> the environment	<b>3</b> <b>PROTECT</b> on-screen content
Does it involve sensitive information?	Who can view your employees' screens?	Keep sensitive information out of sight

### How do PrivaScreen™ Privacy Filters work?

**PrivaScreen™** works by narrowing the viewing angle of your screen, so only the person directly in front can see the display, while it appears dark or black to anyone viewing from the side.

**Clear front view – dark view from 30° angle**

### PrivaScreen™ Features

Prevents visual hacking

Reversible matte side prevents glare

Easy to attach & remove

Suitable for touch screens

Protects from fingermarks & scratches

Contact your local sales representative to discuss your security requirements.
