

Fellowes Contract Interiors Enhances CET Extension with Upgraded Volo® and New Titan™ Modular Wall Series

ITASCA, IL – [JANUARY 16, 2025] – Fellowes Contract Interiors, a leading manufacturer in the contract interiors industry, is excited to announce the enhancement of the Fellowes CET Extension to include an upgraded Volo® experience and the addition of the Titan™ modular wall series.

“Incorporating our modular wall offerings into our expanded CET Extension delivers a comprehensive solution along with our Accessory products,” said Todd Holderness, General Manager, Fellowes Contract Interiors. “We want to create the best possible experience for our dealer designer partners.”

The extension now offers an upgraded, fully functional, and easy-to-specify Volo® Frameless and Frame & Tile offering. Additionally, the Titan™ Frameless product offering has also been added to the extension for easy specification.

“We’ve reimaged and rebuilt the Fellowes Contract Interiors walls experience from the ground up,” said Tim Deemter, Technical Director at PlatinumEdge Solutions, a Grand Rapids-based company that writes and maintains software exclusive to CET Designer and related ecosystems. “We were thrilled to have a partner like Fellowes that allowed us to think and develop creatively as we leverage our experience.”

The Fellowes internal Marketing Technology team worked closely with PlatinumEdge Solutions to develop the modular wall portion of the extension. PlatinumEdge Solutions was able to streamline the user experience, making the Fellowes Contract Interior walls more intuitive to work with and more content-rich.

“Fellowes is pleased to partner with PlatinumEdge Solutions to enhance our CET extension to make the complex nature of architectural modular walls much more user-friendly,” said Holderness.

Fellowes Contract Interior dealer partner designers will have a more straightforward experience when specifying the popular Volo® series. Within CET, the upgraded Volo® will now include more comprehensive options such as paint finishes, Guilford of Maine panel fabrics, Wilsonart laminates, Unika Vaev acoustical materials, and decorative glass and resin by Skyline and 3form, all priced out in the standard offering.

The innovative Titan™ Frameless series, launched in January this year, can be specified with multiple interchangeable trim profiles, single—to double-glazed panes, an

array of paint finishes, and alliance partner materials, including the Skyline and 3form decorative glass and resin.

The Fellowes CET Extension is available for free for Fellowes Contract Interior dealer partners and can be found via Configura's Commercial Interiors Marketplace. Fellowes Contract Interiors is also available to support its dealer partners with training and specifying tips regarding this extension expansion.
