

Fellowes Contract Interiors Announces Enhancements to Volo Modular Wall Product.

Itasca, IL – [June 6, 2024] – Fellowes Contract Interiors, a leading manufacturer of modular walls, announced a series of enhancements to its Volo Modular Wall product line and additional Alliance Partnerships today.

These enhancements include a new fully upholstered Volo Monolithic wall panel plus several new materials from industry Alliance Partnerships, including panel fabrics, film vinyl wall coverings, laminates, resins, and decorative and smart glass.

“We are excited to introduce these new enhancements and materials to our Volo Modular Wall product line,” said Todd Holderness, General Manager, Contract Interiors at Fellowes. “These enhancements provide our customers with even more options to create beautiful and functional spaces that meet their specific needs.”

The fully upholstered Volo Monolithic integrates seamlessly with Volo Framed and Frameless products. The newly introduced pre-assembled panels replace drywall while offering options such as power and data management solutions. Volo will also have a new stackable capability for solid Monolithic or glass stacker panels that will allow full wall capabilities up to 12’ tall ceilings.

Volo is being expanded with newly available Alliance Partnership materials, fabrics and colorways that are perfect for creating private spaces, reducing noise levels, and adding a touch of luxury to any space. The partner material refresh includes several new Clean Impact Textile patterns from Guilford of Maine and several new fashionable woodgrain laminates from Wilsonart. Additionally, Fellowes is excited to announce new partnerships with Skyline Design and 3form, which will provide customers with an array of popular decorative glass, smart glass and beautiful resin options to create unique and stylish environments within the Volo Framed and Frameless product.

Fellowes Contract Interiors will feature these new enhancements at Design Days, which will be held from June 10 through 12 at its Design and Experience Center located on the 9th floor of the 800 W. Fulton building.

The new enhancements will be available for specification and order shortly after Design Days in Q3 2024.
